*Mobile Bag Storage Systems*

## Store more bags in less space... and increase your profits!

That's a promise you can bank on with the Club Max mobile golf bag storage system.

In fact, the Club Max system with its movable aisle design lets you store up to 70% more bags in the same valuable space, whether it's an existing storage room or a newly planned facility.

The additional storage fees made possible by Club Max mean your initial investment can quickly pay for itself, usually in little more than a year. And your Club Max system will continue generating extra revenues for years to come.

## Room to Grow

Club Max expands the profit potential of other Pro Shop activities as well by creating more room for merchandising and work areas and by simplifying the storage and retrieval of members' golf bags. It's such an effective organizer that it's often possible to postpone or even eliminate a costly building expansion. And depending on future needs, a Club Max system can be rearranged to fit a new floor plan or even transferred to another location.

## Open Concept Design

The open concept design of the Club Max system provides brighter lighting and excellent visibility of all golf bags. It also improves air circulation helping prevent musty odors and mold build-up.

## Accommodates 8-foot Ceilings

A major benefit of the Club Max design is that it allows two-tier racking in areas where the ceiling is as low as 8 feet. This can be a critical factor, particularly when upgrading existing storage rooms.

## Easily Installed

Club Max systems are designed to be quickly and easily installed. Some golf courses choose to have their own maintenance staff handle the complete installation guided by the straightforward instructions we provide. On larger installations, NCM's skilled installers can usually have a system installed and operating within one or two days.

## Design Support

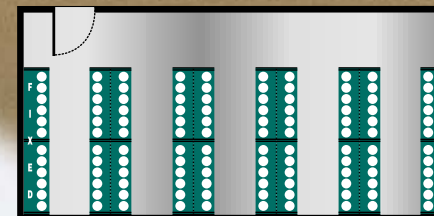

NCM's storage specialists work closely with you to develop the best floor plan for your Club Max installation whether you are upgrading an existing storage room or opening a new facility.

## Push it to the Max

Club Max mobile bag storage systems

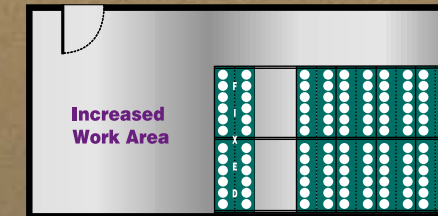

- Store up to 70% more bags in the same space
